Press Release

Mywindparts creation, the French expert in wind turbine logistics

Mywindparts, the new player in the supply chain management for the wind power industry

A partner of the leading turbine manufacturers and spare parts manufacturers, Mywindparts is a new French company with the challenge to supply at its clients the whole of wind turbine spare parts.

Covering the French market in first, then the whole of Europe, Mywindparts answers all the needs of its clients in terms of electrical, mechanical or hydraulic spare parts, main components, wearing parts or consumables.

Mywindparts feature, technical wind power support

More than just a spare parts distributor, Mywindparts understands your industry sector's constraints and the extent of your economic challenges. We are able to offer you effective performance tools because of our expertise :

- personalized advice based on analysis and advice on inventory balance, optimizing safety stocks, the constitution of the relevant stocks...
- technical support on the "components" part (equivalent parts, repair parts, ...), assistance in search specific parts, or in case of out of stock.

Mywindparts provides just the right solution for its clients, one that's time efficient, both technically and financially.

The challenge of Mywindparts ?

Become the preferred distributor of spare parts on the French wind market and cover Europe by quickly extending its scope of action.

Mywindparts, a life project

Beyond the creation of business and the exercise of the profession, Mywindparts is a life project. In particular, it is that of Sébastien Duchesne, engineer passionate about wind power, the proven skills based purchasing and logistics in France and Europe. He was able to go up and give life to this project based on economic partners specialized in the wind power industry.
