

Job Offer

Wind Spare Parts Buyer

Type of Contract : Permanent Contract

Country : France

Company description

Mywindparts is a young company specializing in the supply of spare parts for the wind energy market.

More than just a distributor, Mywindparts offers its services to optimize turbine performance:

- Stock analysis (mini stock, safety stock, turnover rate, ...).
- Repair of spare parts
- Searches for equivalent parts.

Since the beginning of 2020, Mywindparts has been belonging to the company Voltalia which is a renowned player as an electricity producer and service provider in the production of renewable electricity from solar, wind, hydraulic and biomass energies (combining storage solutions).

Job Description

As part of the development of the company, Mywindparts is looking for a Spare Parts Buyer

Reporting to the Managing Director, your mission will consist on:

Market Analysis and Business Needs

- Understand the company's strategy in liaison with the director
- Perform a technological and economic watch activity on the wind market

Selection of suppliers and products

- Identify all the suppliers present on the market that can meet the company's purchasing needs
- Evaluate these suppliers according to the objectives of quality, costs and volumes defined with management, through calls for tender and / or commercial meetings.
- Make precise comparisons of suppliers (benchmarking) according to different key variables: technical and product performance, production capacity, payment delays, supplier's economic health ...
- Establish a panel of suppliers and develop with them privileged relationships, likely to lead to contracts.
- Explore opportunities of sourcing out of low cost countries for specific components.

Commercial negotiations

- Analyze and / or anticipate the objectives of the supplier in terms of commercial objectives: margins, position on his market, financial health, personal sensitivity of the commercial.
- Negotiating with suppliers on prices, the obligations to be respected by the supplier (quality criteria, volumes and delivery times ...), payment terms, etc.
- **Negotiate good warranty condition up to back to back to mitigate the risk of warranty claims**
 - Define the contractual terms and conditions of supplier intervention according to the objectives of the company: framework agreements or single order.
 - Draft or validate, with the help of the legal department, contracts and framework agreements.

Job Offer

Wind Spare Parts Buyer

Monitoring of suppliers and contracts

- Ensure the successful completion of contractually defined agreements.
- Audit and evaluate suppliers according to defined criteria with Management.
- Ensure an interface and internal communication role in order to promote the successful integration of purchases made
- Intervene in the event of a dispute with suppliers and / or non-compliance with the intervention conditions, with the support of the legal department of the company and / or its hierarchical superior.

Reporting

- Ensure the reporting of the Purchasing activity to the Management.

The missions are likely to evolve according to the needs of the company.

Candidate Profile

Experience: 4/5 years as buyer in a wind market.

Training: Engineering degree, master degree in business school or similar,

Languages: English.

Driving license

You have a good knowledge of IT tools and logistics and / or supply chain environments.

You have a strong experience in the wind industry, as a spare parts buyer, where you have been able to highlight your sense of organization, your rigor and your ability to initiative.

You demonstrate great autonomy, have a real ease in project management and have a good sense of relationship.

Finally, you are driven by the sense of service, you have the taste for the field and a very strong appetite for information systems.
